PET/CT Scans

at the Hospital

PET (Positron Emission Tomography) CT combines the strengths of two well-established imaging types, CT for anatomy and PET for function, into a single imaging device. By combining the power of PET and CT in a single scan, disease can be both identified and localized, potentially resulting in an earlier diagnosis.

PET CT allows OLBH physicians to diagnose potential health problems, and if disease is detected, guides them in developing and managing a treatment plan. A PET CT exam not only assists the physician diagnose a problem, it also helps predict the likely

outcome of various therapy alternatives, pinpointing the best treatment approach for each patient.

PET CT is used for cancer patients to determine if tumors have spread throughout the body. PET CT is also used to further evaluate suspicious findings found on a chest x-ray or chest CT scan.

Physician referral is required. Appointments can be made by calling **(606) 833-EXAM (3926)**.

64-Slice CT

at the Hospital

OLBH was the first hospital in Kentucky to offer **64-Slice CT** and is recognized by GE as a 64-Slice CT show site. In the span of five to eight seconds physicians at OLBH are able to capture crystal-clear 3D images of a beating heart, helping them to identify heart disease and pinpoint the exact cause of a patient's chest pain. In 10 seconds, the detailed images from a whole body scan allows physicians to view anatomy at a resolution sometimes not possible even through the most complex of surgeries, and in just four seconds, lung scans can locate life-threatening blood clots or masses.

Other Imaging Services at OLBH

The customer service focused staff of the OLBH Imaging and Radiology Services Department is proud to offer a full range of services. In addition to 64-Slice CT and PET/CT, the staff provides high-definition MRI services, general diagnostic x-rays, ultrasound, nuclear medicine, and DEXA-scan to detect osteoporosis and mammography. Patient appointments can be made by calling **(606) 833-EXAM (3926)**.

Privacy and customer service are at the forefront at the Imaging Center.

DID YOU KNOW...?

OLBH MRI, CT, mammography, and nuclear medicine programs are accredited by the American College of Radiology? This accreditation is a testament to the commitment to quality the OLBH staff has. The accreditation programs evaluate qualifications of personnel, equipment performance, effectiveness of quality control measures, and quality of clinical images.

Imaging Center

at Bellefonte Centre

The OLBH Imaging Center is conveniently located at 1000 Ashland Drive in the Bellefonte Centre. The center offers the same high definition **MRI services** as the hospital. The system produces the area's most detailed images while offering patients a shorter bore and larger opening for maximum comfort. OLBH was the first Ashland hospital to bring high definition MRI to the community.

The center's non-hospital environment provides a host of conveniences for patients. From abundant parking, to valet availability, to the beautiful landscapes outside the windows, the center is completely patient focused. Privacy and customer service are at the forefront at the Imaging Center.

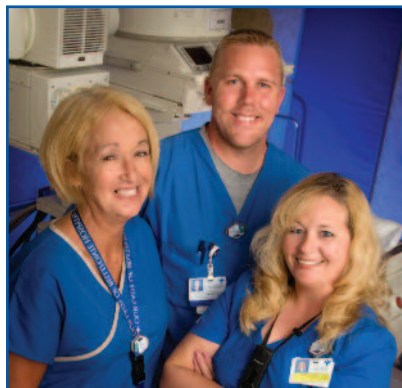

In addition to MRI services, the center offers **CT Scans** and **general diagnostic x-rays**. CT scans and x-rays conducted at the OLBH Imaging Center are read by the same OLBH board certified radiologists as those conducted at the hospital.

Report turnaround time to the patient's doctor for services ordered at the center is within 12 hours and same day appointments are available.

Patient appointments can be made by calling **(606) 833-4MRI (4674)** or **(606) 833-4CAT (4228)**.

OLBH IRONTON IMAGING CENTER

OLBH also offers state-of-the-art imaging services at the OLBH Ironton Imaging Center. The center is located at 1005 East Ring Road, adjacent to Ironton Urgent Care. The center offers **CT services** and an **open-bore MRI**. Patients can be scheduled by calling OLBH Centralized Scheduling at **(606) 833-EXAM** at **800-977-8378**.

Women's Center

at Bellefonte Centre

The staff at the OLBH Women's Center is dedicated to women's health. The center, located on the ground floor of Bellefonte Centre (1000 Ashland Drive), offers GE Full Field digital mammography and features an OLBH surgeon on staff daily. In addition to digital mammography, the center offers:

- breast ultrasound
- surgical consultations
- minimally-invasive breast biopsy
- DEXA-scan to screen for osteoporosis
- Pap Tests
- genetic testing
- clinical breast exams
- women's library
- a retail boutique

Mammography exams at the OLBH Women's Center produce digital images on a computer screen, which help OLBH physicians make the most accurate diagnoses. With this technology, patients experience shorter exam times and faster results, resulting in less anxiety and superior care. If a suspicious spot is found through mammography, patients can usually return and be evaluated by a surgeon within 24 hours.

In addition to digital mammography, OLBH offers computer aided detection (CAD). CAD is a sophisticated screening tool that assists radiologists by providing a computerized second review of mammograms and is approved for both screening and diagnostic use. The review process draws attention to potential areas of concern that may indicate the presence of cancer.

Registration at the OLBH Women's Center is simple and convenient. To schedule a mammogram or other services at the OLBH Women's Center, call **(606) 836-PINK (7465)** or toll free at **866-365-PINK (7465)**. Mammograms for screening purposes do not require a physician order.

OLBH's Women's Center is the first facility of its kind in the area. With services and staff dedicated to women's health, the OLBH Women's Center offers a multitude of services in one location... eliminating unnecessary visits and prolonged waiting for women.
